INSTALLATION

NOTE:

- Before installing the mats, identify their installation positions.
- Connect the mat to the anchors to prevent the mat from sliding forward and possibly interfering with the pedals.
- If you remove a mat, make sure you re-anchor it when you put it back in the vehicle.
- If you replace a mat, use a factory mat designed to be used with anchors.
- If you use a non-factory mat in the driver's footwell, make sure it fits properly and that it can be used with the anchors.
- Do not put an additional mat on top of the anchored mat. An additional mat may slide forward and possibly interfere with the pedals.

Installing the All-season Floor Mats

1. Remove the floor mats as described in the vehicle Owner's Manual.

2. Place the grommets in the driver's all-season floor mat over the anchors. Push the grommets into the anchors to secure the retaining tabs, then turn the knobs 90° to secure the all-season floor mat.

3. Place the passenger's all-season floor mat as shown.

4. Place the left rear all-season floor mat as shown.

5. Repeat step 4 to install the right rear all-season floor mat on the right side of the vehicle.
